Inspect Feature

Basic Course:

The User opens the Inspection Mode Chooser dialog box by selecting the Main Menu Bar button for Inspection Mode. From this dialog box users can select a physical phenomenon and a description of what that feature is about will appear as a Phenomenon Info Panel on the chooser, with a brief description of how it occurs in nature such as Van Allen belts, volcanoes, craters, Van Allen belts etc.

Alternate Courses:

The user selects inspection mode without any Celestial Bodies: An error message will appear above the confirmation button displaying, "Properties cannot be shown until one or more celestial bodies have been generated."
